

SHARED FUTURE – INTERFACE INC. & ZELFO TECHNOLOGY GMBH

January 2013

Interface®

Interface Inc. acquires a shareholding in Zelfo Technology GmbH

Zelfo Technology is delighted to announce that Interface Inc. a world leader in sustainability-focused business is to acquire a shareholding of the company.

Negotiations have been underway for several months and were concluded late in December 2012. The result for both companies is the logical conclusion of several years of co-development of Zelfo related products and processing systems. The negotiations also include an agreement to fuse Zelfo related technical and commercial interests. This will enable Zelfo Technology to clearly present a focused one stop shop for their Optimised Fibre Solutions to their clients as well as increasing the resources of Zelfo Technology itself.

“Interface is a very welcome addition to the company and we look forward to developing the business into the future through this complimentary relationship” commented Zelfo Technology’s CEO, Richard Hurding.
